

Northstar Operations Review

Synthetic fixture for file extraction and question-answering tests. Every organization, person and value in this document is fictional.

Document ID	KIAI-FILES-20260807-PDF-01
Reporting date	2026-08-01
Verification phrase	ORBIT-SAFFRON-4821
Missing-value marker	N/A

Site performance

Site	Planned	Actual	Variance	Defects	Owner
Cairo	120	114	-6	3	Mira Chen
Alexandria	95	101	+6	1	Omar El-Sayed
Aswan	80	72	-8	0	Lina Park
Total	295	287	-8	4	N/A

Variance equals Actual minus Planned. Alexandria is the only site above plan, with a variance of +6 units.

Review rule

Flag a site when either condition is true: actual output is below 90% of planned output, or the site records at least 3 defects. The 90% boundary is inclusive of acceptable performance; exactly 90% is not below 90%.

Applying the rule: Cairo is flagged because it recorded 3 defects. Alexandria is not flagged. Aswan is exactly at 90% of plan and has zero defects, so it is not flagged.

Controlled questions

1. Return the exact document ID and verification phrase.
2. What is the total actual output?
3. Which site exceeded plan, and by how many units?
4. Which sites are flagged by the stated review rule?
5. Who owns the Aswan site, and how many defects did it record?
